

Journal of Cell Science

Volume 121 (10) 2008

Cover: Colocalisation of transiently expressed EYFP-EML3 fusion protein with the mitotic spindle in a HeLa cell. Red colour indicates EYFP-EML3 fusion protein and green colour shows microtubules. Yellow indicates colocalization and DNA is shown in blue. See article by J. Tegha-Dunghu et al. (pp. 1718-1726)

Short Report

- 1587 **In vivo role of lipid adducts on Wingless.** Franch-Marro, X., Wendler, F., Griffith, J., Maurice, M. M. and Vincent, J.-P.

Research Articles

- 1593 **A single point mutation in the LN domain of LAMA2 causes muscular dystrophy and peripheral amyelination.** Patton, B. L., Wang, B., Tarumi, Y. S., Seburn, K. L. and Burgess, R. W.
- 1605 ***Drosophila melanogaster* kl-3 and kl-5 Y-loops harbor triple-stranded nucleic acids.** Piergentili, R. and Mencarelli, C.
- 1613 **Zfp64 participates in Notch signaling and regulates differentiation in mesenchymal cells.** Sakamoto, K., Tamamura, Y., Katsube, K. and Yamaguchi, A.
- 1624 **A verapamil-sensitive chloroquine-associated H⁺ leak from the digestive vacuole in chloroquine-resistant malaria parasites.** Lehane, A. M., Hayward, R., Saliba, K. J. and Kirk, K.
- 1633 **Dnm1p-dependent peroxisome fission requires Caf4p, Mdv1p and Fis1p.** Motley, A. M., Ward, G. P. and Hettema, E. H.
- 1641 **Analysis of Fyn function in hemostasis and α IIb β 3-integrin signaling.** Reddy, K. B., Smith, D. M. and Plow, E. F.
- 1649 **Rab5 modulates aggregation and toxicity of mutant huntingtin through macroautophagy in cell and fly models of Huntington disease.** Ravikumar, B., Imarisio, S., Sarkar, S., O'Kane, C. J. and Rubinsztein, D. C.
- 1661 **PAI1 stimulates assembly of the fibronectin matrix in osteosarcoma cells through crosstalk between the α v β 5 and α 5 β 1 integrins.** Vial, D. and McKeown-Longo, P. J.
- 1671 **Haemocyte-derived SPARC is required for collagen-IV-dependent stability of basal laminae in *Drosophila* embryos.** Martinek, N., Shahab, J., Saathoff, M. and Ringuette, M.
- 1681 **Isoform B of myosin II heavy chain mediates actomyosin contractility during TNF α -induced apoptosis.** Solinet, S. and Vitale, M. L.

Commentaries

- 1569 **Breaking up is hard to do – membrane traffic in cytokinesis.** Prekeris, R. and Gould, G. W.
- 1577 **The RanGTP gradient – a GPS for the mitotic spindle.** Kalab, P. and Heald, R.

- 1693 **Interaction between the *Drosophila* heterochromatin proteins SUUR and HP1.** Pindyurin, A. V., Boldyreva, L. V., Shloma, V. V., Kolesnikova, T. D., Pokholkova, G. V., Andreyeva, E. N., Kozhevnikova, E. N., Ivanoschuk, I. G., Zarutskaya, E. A., Demakov, S. A., Gorchakov, A. A., Belyaeva, E. S. and Zhimulev, I. F.
- 1704 **Integrin clustering enables anandamide-induced Ca²⁺ signaling in endothelial cells via GPR55 by protection against CB₁-receptor-triggered repression.** Waldeck-Weiermair, M., Zoratti, C., Osibow, K., Balenga, N., Goessnitzer, E., Waldhoer, M., Malli, R. and Graier, W. F.
- 1718 **EML3 is a nuclear microtubule-binding protein required for the correct alignment of chromosomes in metaphase.** Tegha-Dunghu, J., Neumann, B., Reber, S., Krause, R., Erfle, H., Walter, T., Held, M., Rogers, P., Hupfeld, K., Ruppert, T., Ellenberg, J. and Gruss, O. J.
- 1727 **Ubiquitin-independent binding of Hrs mediates endosomal sorting of the interleukin-2 receptor β -chain.** Yamashita, Y., Kojima, K., Tsukahara, T., Agawa, H., Yamada, K., Amano, Y., Kurotori, N., Tanaka, N., Sugamura, K. and Takeshita, T.
- 1739 **BNIP2 extra long inhibits RhoA and cellular transformation by Lbc RhoGEF via its BCH domain.** Soh, U. J. K. and Low, B. C.
- 1750 **A spatially restricted increase in receptor mobility is involved in directional sensing during *Dictyostelium discoideum* chemotaxis.** de Keijzer, S., Sergé, A., van Hemert, F., Lommerse, P. H. M., Lamers, G. E. M., Spaink, H. P., Schmidt, T. and Snaar-Jagalska, B. E.
- 1758 **Fos cooperation with PTEN loss elicits keratoacanthoma not carcinoma, owing to p53/p21^{WAF}-induced differentiation triggered by GSK3 β inactivation and reduced AKT activity.** Yao, D., Alexander, C. L., Quinn, J. A., Chan, W.-C., Wu, H. and Greenhalgh, D. A.
