Cover: Immunofluorescence microscopy image of a metaphase-I spindle in a mouse oocyte knocked out for Ppp6c, the gene encoding the catalytic subunit of protein phosphatase 6. Green, microtubules; red, chromosomes. See article by M.-W. Hu et al. (pp. 3769–3780).

STICKY WICKET
3683 Mole’s Wow! So now you have your own lab!
Part VI – FCTWAWKI

CELL SCIENTISTS TO WATCH
3685 Cell scientist to watch – Thomas Wollert

OPINION
3687 Cell adhesion strength from cortical tension – an integration of concepts
Winklbauer, R.

COMMENTARY
3695 Labelling and imaging of single endogenous messenger RNA particles in vivo
Spille, J.-H. and Kubitschek, U.

SHORT REPORTS
3707 A new phosphate-starvation response in fission yeast requires the endocytic function of myosin I

3714 The molecular architecture of hemidesmosomes, as revealed with super-resolution microscopy

RESEARCH ARTICLES
3720 Fission yeast kinesin-8 controls chromosome congression independently of oscillations

3731 Analytical cell adhesion chromatography reveals impaired persistence of metastatic cell rolling adhesion to P-selectin
Oh, J., Edwards, E. E., McClatchey, P. M. and Thomas, S. N.

3744 Failure of lysosome clustering and positioning in the juxtanuclear region in cells deficient in rapsyn
Aitaleb, M., Chen, P.-J. and Akaaboune, M.

3757 Dexamethasone-induced cellular tension requires a SGK1-stimulated Sec5–GEF-H1 interaction

3769 Loss of protein phosphatase 6 in oocytes causes failure of meiosis II exit and impaired female fertility

3781 Essential role of endocytosis for interleukin-4-receptor-mediated JAK/STAT signalling
Kurgonaite, K., Gandhi, H., Kurth, T., Pautot, S., Schwille, P., Weidemann, T. and Bökel, C.

3796 Initiation of lamellipodia and ruffles involves cooperation between mDia1 and the Arp2/3 complex
Isogai, T., van der Kammen, R., Leyton-Puig, D., Kedziora, K. M., Jalink, K. and Innocenti, M.

3811 The clathrin-binding and J-domains of GAK support the uncoating and chaperoning of clathrin by Hsc70 in the brain
Park, B.-C., Yim, Y.-I., Zhao, X., Olszewski, M. B., Eisenberg, E. and Greene, L. E.

3822 ICA1L forms BAR-domain complexes with PICK1 and is crucial for acrosome formation in spermiogenesis
He, J., Xia, M., Tsang, W. H., Chow, K. L. and Xia, J.

CORRECTION
3837 Characterization of Cep85 – a new antagonist of Nek2A that is involved in the regulation of centrosome disjunction
