Cover: MCF10A breast epithelial cells expressing HDAC4–GFP (green) grown in 3D culture for 8 days and stained with anti-GM130 to visualize the Golgi (red) and with TOPRO-3 to identify nuclei (blue). Confocal microscopy section of the equatorial plane. The MEF2–HDAC axis influences epithelial cell proliferation. See article by A. Clocchiatti et al. (pp. 3961–3976).
