Supplement 18 1994

<b>Miyagawa, K., Kent, J., Schedl, A., van Heyningen, V. and Hastie, N. D.</b> Wilms' tumour - a case of disrupted development	1-5	<b>Hoffmann, I. and Karsenti, E.</b> The role of cdc25 in checkpoints and feedback controls in the eukaryotic cell cycle	75-79
<b>Feinberg, A. P.</b> A developmental context for multiple genetic alterations in Wilms' tumor	7-12	<b>Dyson, N.</b> pRB, p107 and the regulation of the E2F transcription factor	81-87
<b>Hooper, M. L.</b> The role of the <i>p53</i> and <i>Rb-1</i> genes in cancer, development and apoptosis	13-17	<b>Peters, G.</b> The D-type cyclins and their role in tumorigenesis	89-96
<b>Watson, K. L., Justice, R. W. and Bryant, P. J.</b> <i>Drosophila</i> in cancer research: the first fifty tumor suppressor genes	19-33	<b>Marengere, L. E. M. and Pawson, T.</b> Structure and function of SH2 domains	97-104
<b>Mansouri, A., Stoykova, A. and Gruss, P.</b> <i>Pax</i> genes in development	35-42	<b>Roussel, M. F.</b> Signal transduction by the macrophage-colony-stimulating factor receptor (CSF-1R)	105-108
<b>Smith, D. P., Eng, C. and Ponder, B. A. J.</b> Mutations of the <i>RET</i> proto-oncogene in the multiple endocrine neoplasia type 2 syndromes and Hirschsprung disease	43-49	<b>Parsons, J. T., Schaller, M. D., Hildebrand, J., Leu, T.-H., Richardson, A. and Otey, C.</b> Focal adhesion kinase: structure and signalling	109-113
<b>Hockenbery, D. M.</b> <i>bcl-2</i> in cancer, development and apoptosis	51-55	<b>Kosako, H., Gotoh, Y. and Nishida, E.</b> Regulation and function of the MAP kinase cascade in <i>Xenopus</i> oocytes	115-119
<b>Saka, Y., Fantes, P. and Yanagida, M.</b> Coupling of DNA replication and mitosis by fission yeast <i>rad4/cut5</i>	57-61	<b>Cantley, L. C. and Songyang, Z.</b> Specificity in recognition of phosphopeptides by src-homology 2 domains	121-126
<b>Moreno, S., Labib, K., Correa, J. and Nurse, P.</b> Regulation of the cell cycle timing of Start in fission yeast by the <i>rum1</i> <sup>+</sup> gene	63-68	<b>Ridley, A. J.</b> Signal transduction through the GTP-binding proteins Rac and Rho	127-131
<b>Reed, S. I., Bailly, E., Dulic, V., Hengst, L., Resnitzky, D. and Slingerland, J.</b> G <sub>1</sub> control in mammalian cells	69-73	<b>INDEX</b>	133-135
