Journal of
CELL SCIENCE
Volume 30   April 1978

page 1 Phillips, H. M. and Steinberg, M. S.  Embryonic tissues as elastico-viscous liquids. I. Rapid and slow shape changes in centrifuged cell aggregates
21 Brown, William J. and Wood, Eunice M.  Ultrastructural localization of cationic proteins in human polymorphonuclear leukocytes
37 Prescott, Lise and Brightman, Milton W.  A technique for the freeze-fracture of tissue culture
45 Gröss, D., Mocquard, J. P., Challice, C. E. and Schrevel, J.  Formation and growth of gap junctions in mouse myocardium during ontogenesis: a freeze-keep study
63 Wise, Gary E., Shienvold, Frances L. and Rubin, Robert W.  Effects of pronase and concanavalin A upon the freeze-etch morphology of cell membranes of intact human erythrocytes
77 Bertaud, W. S.  Membrane junctions in the myelin sheath of goldfish lateral nerve
87 Woods, John W., Woodward, Michael P. and Roth, Thomas F.  Common features of coated vesicles from dissimilar tissues: composition and structure
99 Bereiter-Hahn, J.  Intracellular motility of mitochondria: role of the inner compartment in migration and shape changes of mitochondria in XTH-cells
117 Hodson, Stuart.  The ATP-dependent concentration of calcium by a Golgi apparatus-rich fraction isolated from rat liver
129 Robertson, J. G., Lyttleton, P., Bullivant, S. and Grayston, G. F.  Membranes in lupin root nodules. I. The role of Golgi bodies in the biogenesis of infection threads and peribacteroid membranes
151 Robertson, J. G., Warburton, M. P., Lyttleton, P., Fordyce, A. M. and Bullivant, S.  Membranes in lupin root nodules. II. Preparation and properties of peribacteroid membranes and bacteroid envelope inner membranes from developing lupin nodules
175 Fujisawa, Toshitaka and Sugiyama, Tsutomu.  Genetic analysis of developmental mechanisms in Hydra. IV. Characterization of a nematocyst-deficient strain
187 Koizumi, S. and Kobayashi, S.  The maintenance of kappa during macronuclear reorganization in Paramecium tetraurelia
193 Tourian, Ara, Johnson, Robert T., Burg, Kornel, Nicolson, Susan W. and Sperling, Karl.  Transfer of human chromosomes via human minisegregant cells into mouse cells and the quantitation of the expression of hypoxanthine phosphoribosyltransferase in the hybrids
211 Warren, A. C. and Cook, P. R.  Supercoiling of DNA and nuclear conformation during the cell-cycle
227 Goldstein, Lester, Wise, Gary E., Stephenson, Christopher and Ko, Christine.  Small nuclear RNAs: an association with condensed chromatin in amoebae
237 Summers, Julie M. and Hawkins, Shirley E.  The effect of anticyclic on patterns of RNA synthesis in Amoeba discoidea
251 Schultz, Richard M., Letourneau, Gail E. and Wassarman, Paul M.  Meiotic maturation of mouse oocytes in vitro: protein synthesis in nucleate and anucleate oocyte fragments
265 Myles, Diana Gold.  The fine structure of fertilization in the fern Marsilea vestita
293 Larkin, P. J.  Plant protoplast agglutination by artificial carbohydrate antigens
305 Timpe, L., Martz, E. and Steinberg, M. S.  Cell movements in a confluent monolayer are not caused by gaps: evidence for direct contact inhibition of overlapping
309 Rosomando, Edward F., Maldonado, Barbara, Crean, Edmund V. and Kollar, Edward J.  Protease secretion during onset of development in Dictyostelium discoideum
319 Malchow, D., Nanjundiah, V. and Gerisch, G.  pH oscillations in cell suspensions of Dictyostelium discoideum: their relation to cyclic-AMP signals
331 Byers, Breck, Shriver, Kathleen and Goetsch, Loretta.  The role of spindle pole bodies and modified microtubule ends in the initiation of microtubule assembly in Saccharomyces cerevisiae
353 Friedlander, Michael and Gerashon, Janine.  Reaction of surface lamella of moth spermatozoa to vinblastine
