VOLUME 88 PART 1 AUGUST 1987

<hr/>	
Commentaries	
Dexter, T. M.	
Growth factors involved in haemopoiesis	1
Macgregor, H. C.	
Lampbrush chromosomes	7
Book Reviews	
Skerrow, C. J.	11
Dunn, G. A.	11
<hr/>	
Wheatley, D. N., Inglis, M. S., Foster, M. A. and Rimington, J. E.	
Hydration, volume changes and nuclear magnetic resonance proton relaxation times of HeLa S-3 cells in <i>M</i> -phase and the subsequent cell cycle	13
Kronebusch, P. J. and Singer, S. J.	
The microtubule-organizing complex and the Golgi apparatus are co-localized around the entire nuclear envelope of interphase cardiac myocytes	25
Coleman, J., Evans, D., Hawes, C., Horsley, D. and Cole, L.	
Structure and molecular organization of higher plant coated vesicles	35
Hünseler, P., Scheidgen-Kleyboldt, G. and Tiedtke, A.	
Isolation and characterization of a mutant of <i>Tetrahymena thermophila</i> blocked in secretion of lysosomal enzymes	47
Schofield, P. N., Engstrom, W., Lee, A. J., Biddle, C. and Graham, C. F.	
Expression of <i>c-myc</i> during differentiation of the human teratocarcinoma cell line Tera-2	57
Littlewood, T. D., Hancock, D. C. and Evan, G. I.	
Characterization of a heat shock-induced insoluble complex in the nuclei of cells	65
Hola, M. and Riley, P. A.	
The relative significance of growth rate and inter-division time in the size control of cultured mammalian epithelial cells	73
Pacaud, M. and Harricane, M. C.	
Calcium control of macrophage cytoplasmic gelation: evidence for the involvement of the 70 000 <i>M_r</i> actin-bundling protein	81
Mogensen, M. M. and Tucker, J. B.	
Evidence for microtubule nucleation at plasma membrane-associated sites in <i>Drosophila</i>	95
Takeuchi, S.	
The rearrangement of cytoskeletal systems in epithelial cells accompanying the transition from a stationary to a motile state at the start of epithelial spreading	109
Butler, R. D. and McCrohan, C. R.	
Stimulus-response coupling in the contraction of tentacles of the suctorian protozoan <i>Heliophrya erhardi</i>	121
Takagi, Y., Nobuoka, T. and Doi, M.	
Clonal lifespan of <i>Paramecium tetraurelia</i> : effect of selection on its extension and use of fissions for its determination	129
