

INDEX TO JOURNAL.

VOL. XIII, NEW SERIES.

- Acineta*, new, from N. Wales, 212
 Actinochrome, H. N. Moseley on, 143
 Algae, freshwater, of Gotland and Oland, 117
 „ parasitic, résumé of recent observations on, 366
 Allman, Prof., on the homology of the gonangium of *Halecium*, 55
 Anticosti, deep-sea dredging round the island of, 84
 Aquatic plants, vascular diaphragms of, 296
 Archebiosis and heterogenesis, 357
 Archegonium, comparative researches on the development of, 299
 Archer, W., freshwater algae of Gotland and Oland, 117
 „ parasitic algae, 366
 „ pleurococoid alga on flies, 316
 „ résumé of recent views respecting the nature of lichens, 217
 „ translation of Cohn on *Crenothrix polyspora*, 163
 „ translation of Schwendener on the gonidia of Lichens, 235
Astrodisculus, new species of, 320
 Auerbach's plexus in the intestine of the frog and toad, 376
 Australian caecutcheon, 211
 Auxospores of *Cocconeia cistula*, Ehr., 145
 BACTERIA and the germ theory, 380
 „ Dr. F. Cohn's researches on, 156
 Bacterium, E. R. Lankester on a peach-coloured, 403
 Balfour, F. M., blastoderm, development and growth of the layers of, 266; blood-vessels of the chick, on the development of, 280; primitive groove in the embryo chick, on the disappearance of, 276
 Bastian's heterogenesis of algae, 313
 „ metamorphosis of *Faucheria*, 435
 'Beginnings of Life,' review of, 59
 Bennett, A. W., movements of the glands of *Drosera*, 428
 Betz, Prof., methods of investigating the central nervous system in man, 343
 Blastoderm, the development and growth of the layers of, 266
 Blood-corpuscles, colourless, action of certain reagents on, 307
 „ „ models of, 89
 „ „ red, action of pyrogallic acid on, 89
 „ „ „ number of, in mammals, birds and fishes, 195

- Blood-corpuscles of *Salmonidæ*, 106
 " " shape of nucleus of, 324
 Blood-vessels of the chick, on the development of, 280
 Bone and cartilage, researches on, 169
 " development of, 91
 " growth of, 92
 Brain and spinal cord, preparation of, for microscopical examination, 306
 " connective tissue of, 96
 " cortical substance of, 95
 " termination of nerve-fibres in cortex of, 94
 Brébisson's collection of Diatomaceæ, 85
- Carex pulicaris*, development of perigynium and seta of, 436
 Capillaries, development of, 97
 Carmine staining, 427
 Cell-formation, endogenous, 88
 Cell theories, Prof. J. Cleland on, 255
 Chlorophyll-granules, multiplication of, by division, 295
 Chromic acid for hardening, 427
 Chronicle, Quarterly, of Microscopical Science—
 Botany, 294
 Embryology, 430
 Histology, 86
 Minute organisms and disease, 196
- Cleland, Prof. J., on cell theories, 255
 Cochlea, Dr. Pritchard on, 207
 Coffee-leaf fungus of Ceylon, 79
 Cohn, Dr. F., Beiträge, 85
 " " on *Crenothrix polyspora*, 163
 " " researches on Bacteria, 156
 Corti's organ, 77
- Cosmarium tetrachondrum*, Lundell, 315
Crenothrix polyspora, Cohn, 163
 Croup and diphtheria, histological difference between, 432
 Crystal prisms, 216
 " " in Compositæ, 324
 " " in Leguminosæ, 294
 " in seed-coats of plants, 439
- DARK-GROUND illuminator, Wenham's, 99
 " " Dr. Barker's, 312
 Desmidiæ of Westmoreland and N. Wales, 212
 Diatomaceæ, Brébisson's collection of, 85
 " O'Meara on recent researches in, 9
Draparnaldia, encysted state of, 433
 Draw-tubes versus deep-eye pieces, 84, 194
Drosera, movements of the glands of, 428
- EAR, human, *Peziza* in, 199
 " of hedgehog, 98
 Elm, crystals in testa of, 290
 Embryo of Phanerogams, Hanstein on development of, 51
 Embryos of pig, method of making preparations of, 202
 Epidermis of Tway-blade, 290
 Epithelium, ciliated, medium for preserving, 89
 Erysipelas, 198
Euastrum binale, 434
 " " varieties of, 315
 Eye, development of, 97
 " of lobster, structure of, 325
- FERMENTATIONS, new contribution to the theory of, 351

- Flower, development of, in *Canna*, 294
 " " " in *Papilionaceae*, 294
 Fungoid growth in the heart, 197
- GLANDS of the gizzard of birds, 97
 Gulliver, G., elm, on crystals in testa of, 290
 " " epidermis of Tway-blade, on, 290
 Gustatory organs, man, 96
 " " sting-ray, 97
- Halecium*, on the homology of the gonangium of, 55
 Hamilton, D. J., on injecting objects for microscopical examination, 252
 Hay asthma, 199
 Hanstein's researches on the development of the embryo of Phanerogams, 51
 Hedgehog, ear of, 98
 Heitzman, C., researches on bone and cartilage, 169
Hemileia vastatrix, 79
 Heterogenous stem-structure, 297
 Hincks, Rev. Thomas, contribution to the history of the Polyzoa, 16
 " " on *Ophryodendron abietinum*, Clap. and Lach., 1
 Hogg, J., address to Medical Microscopical Society, 203
- INJECTING objects for microscopical examination, D. J. Hamilton on, 252
 Insects, H. N. Moseley on the injection of the blood-vessels and finest gland-ducts of, 85
- KIDNEY, muscles of, 92
 Klein, Dr., on Auerbach's plexus, 376
- LANKESTER, E. R., blue stentorin, 139
 " " peach-coloured bacterium, 408
 Laticiferous vessels from onion, 437
 Leucocytes, cell-wall of, 88
 Lichens, Prof. S. Schwendener on the nature of the gonidia of, 235
 " résumé of recent views respecting the nature of, 217
 " Berkeley on Schwendener's theory of, 79
 Lister, Prof. J., bacteria and the germ theory, 380
 Liver, lymphatics of capsule of, 97
 Logwood as a staining material, 86
 Lycopodiaceae, carboniferous, on stem structures of, 152
 Lycopodium, epidermis of, 434
 " morphology of, 298
 " reproduction of, 298
 Lymphatics, 97
- M'NAB, Prof. W. R., notes on Hanstein's researches on the development of the embryo of Phanerogams, 51
Mastogloia, new species of, 319
Monostroma rosea, 99
 Moseley, H. N., actinochrome, 143
 " injection of the blood-vessels and finest gland-ducts of insects, 85
 Muscle, striated, structure of, 92
- Navicula bicuneata*, Grun., 311
 " *rhomboides* in pellucid tubes, 101
Nematophycus Logani, Carr., 312
 Nerves, changes in, with shocks of induced current, 94
 " connective tissue and vessels of, 86

- Nerves, peripheral, distribution of, 94
 „ spinal, structure of roots of, 92
- Nervous system, central, in man, method of investigating, 343
- Newton, E. T., on the structure of the eye of the lobster, 325
- OMENTUM, on certain points in the histology of, 309
- O'Meara, Rev. E., on recent researches in Diatomaceæ, 9
 „ translation of Schmitz on auxospores of *Cocconema cistula*, Ehr., 145
- Ophryodendron abietinum*, Clap. and Lachm., 1
- Ovum of rabbit, fecundation and development of, 430
- PANCERI, Prof. P., light emanating from the nerve-cells of *Phyllirrhoe bucephala*, 109
 „ luminous organs and light of *Pyrosoma*, 45
- Pasteur, L., new contribution to the theory of fermentations, 351
- Phyllirrhoe bucephala*, Prof. P. Panceri on the light emanating from the nerve-cells of, 109
- Pleurococoid alga on flies, 316
- Podisoma juniperi*, 301
- Pollen of *Petasites fragrans*, 214
 „ amyloid particles in the fovilla of, 295
- Polysa*, contributions to the history of, 16
- Porphyrea*, 300
- Primitive groove in the embryo chick, on the disappearance of, 276
- Putrid fluid, effects of injecting, 197
- Pyrosoma*, Prof. P. Panceri on the luminous organs and light of, 45
- RANVIER, L., on the connective tissue and vessels of nerves, 36
- Raphides, 321
- Retina, Retzius on, 97
- Reviews :
 Barkas's Manual of Coal Measure Palæontology, 426
 Bastian's Beginnings of Life, 59
 Micrographic Dictionary, 74
 Préparations microscopiques tirées du regne végétal, 82
 Stricker's Manual of Histology, 187
- Rhizopodous form, new, 102
- Richardson, B. W., on Xanthine, 168
- Rutherford, Prof. W., letter from, 77
- SCHMITZ, Fr., on formation of auxospores of *Cocconema cistula*, Ehr., 145
- Schwendener, Prof. S., nature of the gonidia of Lichens, 235
- Selenastrum Bibrainum*, Reinsch, 316
- Sense organs in snakes, 96
- Serous membranes, structure of, 89
- Soap, glycerine, for imbedding tissues, 87
- Societies—
 Dublin Microscopical Club, 99, 211, 310, 434
 East Kent Natural History, 103, 214, 321, 439
 Medical Microscopical, 107, 203, 303, 433
 Royal Microscopical, 200, 302
- Sphacleraria*, 301
- Sphaeraphides of *Caryophyllaceæ*, 106
- Spleen, 98

- Staurastrum Ophiura* in England, 311
Stenopterix hirundinis, 104
 Stentorin, blue, 139
 Syphilis, 199
- TEETH, multinucleated cells in, 89
 Testicle, tubuli seminiferi of, 98
 Thiselton Dyer, W. T., on stem structures of carboniferous Lycopodiaceae, 152
 Tissues, modes of cutting sections of, 304
 „ in the living state, methods of observing, 303
 Transferring objects from glycerine to Canada balsam, 87
 Trichomes, development of, 297
 Tubes in pith of *Sambucus nigra*, 295
 Tyloses, 312
- Wetwitschia*, Prof. McNab on, 319, 320
 Whiteaves, T. F., on deep-sea dredging round the island of Anticosti, 84
 Winkel, microscopes of, 83
 Wittcock, Dr. V. W., freshwater algae of Gotland and Oland, 117
- XANTHINE, 168
- ZYGOSPORES, indeterminate, 103
 „ from Toole's Rocks, 99
 „ *Staurastrum Brébissonii*, 435
 „ *Xanthidium armatum*, Bréb., 310
