CONTENTS

Volume 100, Part 1

Ryder, M. L. Some Histochemical Observations on Amino-acids and Nucleic Acids in the Wool Follicle

Jones, J. C. A Phase Contrast Study of the Blood-cells in Prodenia Larvae (Order Lepidoptera)

King, R. J. A Quantitative Study of the Cytoplasm of Ascites Tumour Cells in Mice

Kennaugh, J. An Examination of the Cuticles of two Scorpions, Pandinus imperator and Scorpiops hardwickii

Srivastava, U. S. The Prothoracic Glands of some Coleopteran Larvae

Hinton, H. E. The Function of Chromatocytes in the Simuliidae, with Notes on their Behaviour at the Pupal-adult Moult

Nichols, D. The Histology of the Tube-feet and Clavulae of Echinocardium cordatum

Anderson, D. T. The Embryology of the Polychaete Scoloplos armiger

Volume 100, Part 2

Bone, Q. Observations upon the Nervous Systems of Pelagic Tunicates

Burnstock, G. The Morphology of the Gut of the Brown Trout (Salmo trutta)

Burnstock, G. The Innervation of the Gut of the Brown Trout (Salmo trutta)

Davey, K. G. Spermatophore Production in Rhodnius prolixus

Przełęcka, A. A Study of Rawitz’s ‘Inversion Staining’

Dasgupta, B. The Feulgen Reaction in the Different Stages of the Life-cycles of Certain Sporozoa

Matty, A. J., and Matty, J. M. A Histochemical Investigation of the Pituitary Glands of some Teleost Fish

Clayton, Blanche-P. The Action of Fixatives on the Unmasking of Lipid

Chayen, J., and Gahan, P. B. An Improved and Rapid Embedding Method
Chayen, J., Gahan, P. B., and La Cour, L. F. The Nature of a Chromosomal Phospholipid 279

Wigglesworth, V. B. A Simple Method for Cutting Sections in the 0.5 to 1μ Range, and for Sections of Chitin 315

Baker, J. R., and Llowarch, W. The Use of the Philips ‘Mirror-condenser Lamp’ in Microscopy 321

---

Volume 100, Part 3

Chayen, J., Gahan, P. B., and La Cour, L. F. The Masked Lipids of Nuclei 325

Malhotra, S. K. What is the ‘Golgi Apparatus’ in its Classical Site within the Neurones of Vertebrates? 339

George, J. C., and Eapen, J. A Histological and Histochemical Study of the Brown and Yellow Adipose Tissue of the Bat, *Hipposideros speoris* 369

Fraser, A. Neurosecretion in the Brain of the Larva of the Sheep Blowfly, *Lucilia caesar* 377

Fraser, A. Neurosecretory cells in the Abdominal Ganglia of Larvae of *Lucilia caesar* (Diptera) 395

Dutta, G. P. Histochemical Studies of *Herpetomonas muscarum* 413

Owen, G. A New Method for Staining Connective Tissue Fibres, with a note on Liang’s Method for Nerve-fibres 421

Williams, P. L. Sections of Fresh Mammalian Nerve-trunks for Quantitative Studies: A Rapid Freezing Technique 425

Jackson, D. J. The Association of a Slime Bacterium with the Inner Envelope of the Egg of *Dytiscus marginalis* (Coleoptera), and the less common Occurrence of a similar Bacterium on the Egg of *D. semisulcatus* 433

Dahl, E. The Ontogeny and Comparative Anatomy of some Protocerebral Sense Organs in Notostracan Phyllopods 445

Allanson, M., Foster, C. L., and Menzies, G. Some Observations on the Cytology of the Adenohypophysis of the Nonparous Female Rabbit 463
Volume 100, Part 4

Bradbury, S. The Botryoidal and Vasofibrous Tissue of the Leech Hirudo medicinalis 483

Wendell-Smith, C. P., and Williams, P. L. The Use of Teased Preparations and Frozen Sections in Quantitative Studies of Mammalian Peripheral Nerve 499

Bone, Q. The Central Nervous System in Larval Acraniates 509

Simkiss, K., and Tyler, C. The Possible Calcification Mechanisms in some Reptilian Egg-shells 529

Nichols, D. The Histology and Activities of the Tube-feet of Echinocyamus pusillus 539

Jones, W. C. Spicule Growth Rates in Leucosolenia variabilis 557

Locke, M. A Note on Berenbaum's Acetone / Sudan Black Technique for Bound Lipids applied to Insect Cuticle 571

Brewin, B. I. An Account of Larval Budding in the Compound Ascidian, Hypsistozoa fasmeriana 575

Brunet, P. C. J., and Small, P. L. An Improved Radioautographic Method for demonstrating Tyrosine Uptake and Tyrosinase Activity in Melanocytes 591

Chapman, G. The Mesogloea of Pelagia noctiluca 599
His experience confirms that the standardized and carefully controlled methods employed in the manufacture of B.D.H. Stains ensure that uniform materials are produced which enable him to obtain consistent results, time after time.

A new and completely rewritten edition of the booklet about B.D.H. Standard Stains, entitled ‘Biological Stains and Staining Methods’, has now been published and may be obtained on request free of charge.
