

Cover: Live-cell imaging of chicken hepatocytes transfected with EGFP fused to the N-terminal region of glutamine synthetase (green) and stained with MitoTracker (red). EGFP is targeted to the mitochondria. For more information on the mechanism of differential targeting of glutamine synthetase in liver and brain cells, see article by G. D. Matthews et al. (pp. 351-359).

- Sticky Wicket**
 295 **Elephants I – new PIs.** Mole
- Commentaries**
 297 **Matrix elasticity, cytoskeletal forces and physics of the nucleus: how deeply do cells ‘feel’ outside and in?** Buxboim, A., Ivanovska, I. L. and Discher, D. E.
 309 **Signalling complexes and clusters: functional advantages and methodological hurdles.** Cebecauer, M., Spitaler, M., Sergé, A. and Magee, A. I.
- Research Articles**
 321 **Cdc20 is required for the post-anaphase, KEN-dependent degradation of centromere protein F.** Gurden, M. D. J., Holland, A. J., van Zon, W., Tighe, A., Vergnolle, M. A., Andres, D. A., Spielmann, H. P., Malumbres, M., Wolthuis, R. M. F., Cleveland, D. W. and Taylor, S. S.
 331 **Functional transformation of the chromatoid body in mouse spermatids requires testis-specific serine/threonine kinases.** Shang, P., Baarends, W. M., Hoogerbrugge, J., Ooms, M. P., van Cappellen, W. A., de Jong, A. A. W., Dohle, G. R., van Eenennaam, H., Gossen, J. A. and Grootegoed, J. A.
 340 **Pollen-tube tip growth requires a balance of lateral propagation and global inhibition of Rho-family GTPase activity.** Hwang, J.-U., Wu, G., Yan, A., Lee, Y.-J., Grierson, C. S. and Yang, Z.
 351 **Weak mitochondrial targeting sequence determines tissue-specific subcellular localization of glutamine synthetase in liver and brain cells.** Matthews, G. D., Gur, N., Koopman, W. J. H., Pines, O. and Vardimon, L.
 360 **LRP6 is internalized by Dkk1 to suppress its phosphorylation in the lipid raft and is recycled for reuse.** Sakane, H., Yamamoto, H. and Kikuchi, A.
 369 **Novel Staufen1 ribonucleoproteins prevent formation of stress granules but favour encapsidation of HIV-1 genomic RNA.** Abrahamyan, L. G., Chatel-Chaix, L., Ajamian, L., Milev, M. P., Monette, A., Clément, J.-F., Song, R., Lehmann, M., DesGroseillers, L., Laughrea, M., Boccaccio, G. and Moulard, A. J.
 384 **Reduced myofibrillar connectivity and increased Z-disk width in nebulin-deficient skeletal muscle.** Tonino, P., Pappas, C. T., Hudson, B. D., Labeit, S., Gregorio, C. C. and Granzier, H.
 392 **Three-dimensional organization of promyelocytic leukemia nuclear bodies.** Lang, M., Jegou, T., Chung, I., Richter, K., Münch, S., Udvarhelyi, A., Cremer, C., Hemmerich, P., Engelhardt, J., Hell, S. W. and Rippe, K.
 401 **Dynamic regulation of ROCK in tumor cells controls CXCR4-driven adhesion events.** Struckhoff, A. P., Vitko, J. R., Rana, M. K., Davis, C. T., Foderingham, K. E., Liu, C.-H., Vanhoy-Rhodes, L., Elliot, S., Zhu, Y., Burow, M. and Worthylake, R. A.
 413 **Cytoskeletal coherence requires myosin-IIA contractility.** Cai, Y., Rossier, O., Gauthier, N. C., Biais, N., Fardin, M.-A., Zhang, X., Miller, L. W., Ladoux, B., Cornish, V. W. and Sheetz, M. P.
 424 **Dynamic organisation of prolactin gene expression in living pituitary tissue.** Harper, C. V., Featherstone, K., Semprini, S., Friedrichsen, S., McNeilly, J., Paszek, P., Spiller, D. G., McNeilly, A. S., Mullins, J. J., Davis, J. R. E. and White, M. R. H.
 431 **Myosin light chain kinase mediates transcellular intravasation of breast cancer cells through the underlying endothelial cells: a three-dimensional FRET study.** Khuon, S., Liang, L., Dettman, R. W., Sporn, P. H. S., Wysolmerski, R. B. and Chew, T.-L.
 441 **Digestive-vacuole genesis and endocytic processes in the early intraerythrocytic stages of *Plasmodium falciparum*.** Abu Bakar, N., Klonis, N., Hanssen, E., Chan, C. and Tilley, L.
 451 **Nuclear-localized subtype of end-binding 1 protein regulates spindle organization in *Arabidopsis*.** Komaki, S., Abe, T., Coutuer, S., Inzé, D., Russinova, E. and Hashimoto, T.
 460 **Functional characterization of protein-sorting machineries at the *trans*-Golgi network in *Drosophila melanogaster*.** Kametaka, S., Sawada, N., Bonifacino, J. S. and Waguri, S.
 472 **Vang-like protein 2 and Rac1 interact to regulate adherens junctions.** Lindqvist, M., Horn, Z., Bryja, V., Schulte, G., Papachristou, P., Ajima, R., Dyberg, C., Arenas, E., Yamaguchi, T. P., Lagercrantz, H. and Ringstedt, T.
 484 **FAK-mediated extracellular signals are essential for interkinetic nuclear migration and planar divisions in the neuroepithelium.** Tsuda, S., Kitagawa, T., Takashima, S., Asakawa, S., Shimizu, N., Mitani, H., Shima, A., Tsutsumi, M., Hori, H., Naruse, K., Ishikawa, Y. and Takeda, H.
