

## Index of Subjects

### A

- Acetylated tubulin**  
in domains that turn over slowly: WEBSTER & BORISY 57
- Acidic secretory vesicle**  
in living *Paramecium*: BUSCH & SATIR 197
- Acrosome reaction**  
in mouse fertilization: VASQUEZ, PHILLIPS & WASSARMAN 713
- Actin**  
-dependent collapse of intermediate filaments:  
HOLLENBECK, BERSHADSKY, PLETJUSHKINA, TINT & VASILIEV 621
- Adhesion**  
trypsin-mediated detachment, kinetics in Duchenne dystrophy: SIMON, PIZZHEY & JONES 257
- Alpha interferon**  
locus in same region as gene for anchorage independence suppression, on rat chromosome 5: ISLAM, SZPIRER, SZPIRER, ISLAM, DASNOY & LEVAN 147
- Anchorage independence**  
gene for suppression located on rat chromosome 5 in same region as alpha interferon locus: ISLAM, SZPIRER, SZPIRER, ISLAM, DASNOY & LEVAN 147
- Anther**  
development in rice: RAGHAVAN 217
- Antigenic variation**  
in *Paramecium*, distribution of surface antigens: ANTONY & CAPDEVILLE 205
- Astrocytes**  
in culture, good substrates for axonal growth: FAWCETT, ROKOS & BAKST 93
- ATP depletion**  
effect of, on intermediate filament collapse: HOLLENBECK, BERSHADSKY, PLETJUSHKINA, TINT & VASILIEV 621
- Axon**  
repelled by oligodendrites: FAWCETT, ROKOS & BAKST 93
- Axon regeneration**  
inhibited by oligodendrocytes: FAWCETT, ROKOS & BAKST 93
- 5-Azacytidine**  
in transformed Chinese hamster cells: GRANT & WORTON 723

### B

- Basement membrane**  
matrix invaded by chick embryo primitive streak cells: SANDERS & PRASAD 497
- B lymphocytes**  
murine, RNA and DNA synthesis, role of RNA polymerase I: HALLECK, SCHLEGEL & ROSE 101
- Bomirski melanoma**  
effects of MSH on growth: SLOMINSKI, MOELLMANN & KUKLINSKA 551

### C

- Calmodulin**  
in cilia after removal of microtubules: STEPHENS, OLESZKO-SZUTS & LINCK 391

### Capping

ConA-induced of *D. discoideum* cells: PATTON, DHANAK & JACOBSON 85

### Carrot cells

cytoplasmic fibrillar bundles, monoclonal antibody:  
HARGREAVES, DAWSON, BUTCHER, LARKINS, GOODBODY & LLOYD 371

### CCCP

VSV glycoprotein accumulates in Golgi, in presence of:  
BURKHARDI, HESTER & ARGON 643

### Cell cycle

control by circadian clock; in *Gonyaulax*: HOMMA & HASTINGS 303

fission yeast protein required for commitment: SIMANIS & NURSE 51

in *Drosophila*: GLOVER 137

### Cell cycle control

in *Tetrahymena* mutant: CLEFFMANN 349

### Cell differentiation

lectin binding of F9 embryonal carcinoma cells: TIENARI, VIRTANEN & LEHTONEN 561

### Cell division

in *Gonyaulax polyhedra*: HOMMA & HASTINGS 303

### Cell dry weight

and volume in cultured *Tetrahymena*: HELLUNG-LARSEN & ANDERSEN 319

### Cell growth law

in *Gonyaulax polyhedra*: HOMMA & HASTINGS 303

### Cell hybridization

of female Chinese hamster cells: GRANT & WORTON 723

### Cell locomotion

in fibroblasts, microinterferometry: BROWN & DUNN 379

### Cell model

of *Chlamydomonas* mutant *oda* in study of force production by dynein: SAKAKIBARA & KAMIYA 77

### Cell movement

facilitated by glycosaminoglycans, through collagen matrices: DOCHERTY, FORRESTER, LACKIE & GREGORY 263

### Cell shape

changes with collagenase secretion only in presence of cytokine: KUTER, JOHNSON-WINT, BEAUPRE & GROSS 473

### Cell-substratum interaction

modified hydroxymethylmethacrylate hydrogels as modelling tools: BERGETHON, TRINKHAUS-RANDALL & FRANZBLAU 111

### Cell volume

and dry weight of cultured *Tetrahymena*: HELLUNG-LARSEN & ANDERSEN 319

### Chick embryo

primitive streak cells invade basement membrane matrix:  
SANDERS & PRASAD 497

### Chick heart fibroblasts

microinterferometry of movement of dry matter: BROWN & DUNN 379

### Chicken liver ferritin

bound by coated vesicles: PASSANITI & ROTH 187

### Chlamydomonas

mutant lacking outer dynein arm can swim slowly:  
SAKAKIBARA & KAMIYA 77

### Chondrocytes

proteoglycan synthesis inhibited by cyclofenil diphenol:  
LANCASTER, FRYER, GRIFFITHS & MASON 271

### **Chromosome ordering**

of *Crepis capillaris* in mitosis: OUD, MANS, BRAKENHOFF, VAN DER VOORT, VAN SPRONSEN & NANNINGA 329

### **Cilia**

dynein arms in *Chlamydomonas*: SAKAKIBARA & KAMIYA 77

in *Euplotes*, cortical proteins: WILLIAMS, HONTS, LU, OLSON & MOORE 433

length and quantal tektin synthesis in sea-urchin embryos: STEPHENS 403

retention of ninefold structure after removal of microtubules: STEPHENS, OLESZKO-SZUTS & LINCK 391

### **Ciliogenesis**

in quail oviduct, *in vitro* effects of taxol: BOISVIEUX-ULRICH, LAINE & SANDOZ 9

in sea-urchin embryos, length and tektin synthesis: STEPHENS 403

### **Circadian rhythm**

in cell cycle of *Gonyaulax polyhedra*: HOMMA & HASTINGS 303

### **Clathrin**

coated vesicles from chicken liver bind ferritin: PASSANITI & ROTH 187

### **Coated vesicles**

from chicken liver bind ferritin: PASSANITI & ROTH 187

### **Collagen matrices**

movement of fibroblasts through facilitated by glycosaminoglycans: DOCHERTY, FORRESTER, LACKIE & GREGORY 263

### **Collagenase**

secretion with cell shape change, in presence of cytokine: KUTER, JOHNSON-WINT, BEAUPRE & GROSS 473

### **Concanavalin A**

-induced capping of *D. discoideum* cells: PATTON, DHANAK & JACOBSON 85

### **Confocal scanning laser microscopy**

in localization of nuclear matrix-associated antigen: VERHEIJEN, KUIJPERS, SCHLINGEMANN, BOEHMER, VAN DRIEL, BRAKENHOFF & RAMAEKERS 123

in study of chromosome arrangement in *Crepis capillaris* in mitosis: OUD, MANS, BRAKENHOFF, VAN DER VOORT, VAN SPRONSEN & NANNINGA 329

in study of nucleolar antigens in mitotic cells: VERHEIJEN, KUIJPERS, VAN DRIEL, BECK, VAN DIERENDONCK, BRAKENHOFF & RAMAEKERS 531

### **Cortical proteins**

identification and localization in *Euplotes*: WILLIAMS, HONTS, LU, OLSON & MOORE 433

### **Cortical residues**

microtubule-free, from *Paramecium*: WILLIAMS, HONTS & STUART 427

### ***Crepis capillaris***

three-dimensional chromosome arrangement in mitosis: OUD, MANS, BRAKENHOFF, VAN DER VOORT, VAN SPRONSEN & NANNINGA 329

### **Cultured epithelia**

of human sweat gland with capacity for transepithelial ion transport: LEE & DESSI 241

### **Cyclic AMP**

increased in melanoma cells by MSH: SLOMINSKI, MOELLMANN & KUKLINSKA 551

### **Cyclic GMP**

in study of effects of MSH in melanoma cells: SLOMINSKI, MOELLMANN & KUKLINSKA 551

### **Cyclic GMP-binding proteins**

nucleic acid-regulated binding activity, in *Dictyostelium*: PARISENTI & COUKELL 291

### **Cyclofenil diphenol**

inhibition of proteoglycan synthesis in chondrocytes: LANCASTER, FRYER, GRIFFITHS & MASON 271

### **Cystic fibrosis**

sterility, study of ductal epithelial cells from epididymis and vas deferens: HARRIS & COLEMAN 687

### **Cytokines**

presence required for collagenase secretion with cell shape change: KUTER, JOHNSON-WINT, BEAUPRE & GROSS 473

### **Cytoplasmic streaming**

in *Nicotiana* pollen tubes: TANG, HEPLER & SCORDILIS 569

### **Cytoskeletal reorganization**

effect of methotrexate: JACKSON, PEARSON, FRASER, PRISE & WONG 37

### **Cytoskeleton**

associated with surface transferrin receptors in pigment epithelium: HUNT, DEWEY & DAVIS 655

organization during meiosis in *Solanum melongina*: TRAAS, BURGAIN & DUMAS DE VAULX 541

Triton-insoluble fraction, contains plasma membrane proteins in *D. discoideum* capping: PATTON, DHANAK & JACOBSON 85

## **D**

### **DAPI fluorescent stain**

in study of fission yeast wild-type and mutant *cdc2.33* cells: KHAR & MITCHISON 345

### **Desmosomes**

changes to antigens during differentiation in normal human epidermis: SKERROW, CLELLAND & SKERROW 667

### ***Dictyostelium***

nucleic acid-regulated cyclic GMP-binding activity: PARISENTI & COUKELL 291

### ***Dictyostelium discoideum***

partitioning of plasma membrane proteins after ConA-induced capping: PATTON, DHANAK & JACOBSON 85

### **Differentiation**

glycosaminoglycan expression in cultured intestinal epithelial fibroblasts: BOUZIGES, SIMON-ASSMANN, LEBERQUIER, HAFFEN & KEDINGER 679

in normal human epidermis, desmosomal antigens and lectin-binding sites, changes: SKERROW, CLELLAND & SKERROW 667

### **DNA methylation**

in transformed diploid female Chinese hamster cells: GRANT & WORTON 723

### **Dinoflagellates**

cell growth, kinetics, division asymmetry, volume control: HOMMA & HASTINGS 303

### **Division block**

in *Tetrahymena* mutant in cell cycle: CLEFFMANN 349

### **DNA lesions**

induced by methotrexate: JACKSON, PEARSON, FRASER, PRISE & WONG 37

### **DNA synthesis**

in murine B lymphocytes, role of RNA polymerase I: HALLECK, SCHLEGEL & ROSE 101

### ***Drosophila***

mitosis: GLOVER 137

- Duchenne dystrophy**  
fibroblasts, kinetics of trypsin-mediated detachment of cell-substratum attachment: SIMON, PIZZEY & JONES 257
- Dynein**  
inner and outer arms in *Chlamydomonas*: SAKAKIBARA & KAMIYA 77

## E

- Ecdysome**  
-stimulated cells, interaction of nucleus with hsp27 of *Drosophila*: BEAULIEU, ARRIGO & TANGUAY 29
- Eggplant**  
organization of cytoskeleton during meiosis: TRAAS, BURGAIN & DUMAS DE VAULX 541
- 80K integral membrane protein**  
on surface of secreting rat basophilic leukaemia cells, recycling: BONIFACINO, YUAN & SANDOVAL 701
- Embryonal carcinoma lectins**  
binding and surface proteins: TIENARI, VIRTANEN & LEHTONEN 561
- Emerogene**  
suppresses anchorage independence, located in rat chromosome: ISLAM, SZPIRER, SZPIRER, ISLAM, DASNOY & LEVAN 147
- Endothelium**  
cultured, aortic, effect of anoxia: SMITH 505
- Epidermis**  
normal human, differentiation, quantitative ultrastructural study: SKERROW, CLELLAND & SKERROW 667
- Epididymis**  
human foetal, ductal epithelial cells in cystic fibrosis: HARRIS & COLEMAN 687
- Erythrocyte membrane**  
protein distribution during malarial invasion: DLUZEWSKI, FRYER, GRIFFITHS, WILSON & GRATZER 691
- Erythroleukaemia cells**  
murine, glycophorin expression in: ULMER, DOLCI & PALADE 163
- Euplotes**  
identification and localization of cortical proteins: WILLIAMS, HONTS, LU, OLSON & MOORE 433
- Extracellular matrix**  
distribution of integrins in focal contacts determined by substratum composition: FATH, EDGELL & BURRIDGE 67
- Exocytosis**  
in *Paramecium*, secretory proteins: TINDALL, DeVITO & NELSON 441

## F

- Fibrillar bundles**  
from carrot cytoplasm, monoclonal antibody cross-reacts with animal intermediate filaments: HARGREAVES, DAWSON, BUTCHER, LARKINS, GOODBODY & LLOYD 371
- Fibroblasts**  
normal and Duchenne, adhesion detachment by trypsin: SIMON, PIZZEY & JONES 257  
proliferation, cell counting method: OLIVER, HARRISON, BISHOP, COLE & LAURENT 513
- Fibronectin receptor**  
distribution in endothelium-derived cell line, plated on various substrata: FATH, EDGELL & BURRIDGE 67
- Fission yeast**  
wild-type and mutant *cdc2.33* cells: KHAR & MITCHISON 345

- Flagella**  
dynein arms in *Chlamydomonas*: SAKAKIBARA & KAMIYA 77
- Flow cytometry**  
in study of nucleolar antigen in mitotic cells: VERHEIJEN, KUIJPERS, VAN DRIEL, BECK, VAN DIERENDONCK, BRAKENHOFF & RAMAEKERS 531
- Force generation**  
in extracted translocation system from insect microtubules: STEBBINGS & SHARMA 21
- Fracture-flip**  
reveals surface views of spermatozoa: ANDERSSON-FORSMAN & PINTO DA SILVA 415
- Freeze-fracture**  
in study of spermatozoa: ANDERSSON-FORSMAN & PINTO DA SILVA 415

## G

- G<sub>1</sub>**  
in *Schizosaccharomyces pombe*: SIMANIS & NURSE 51
- G<sub>1</sub>, G<sub>2</sub> arrest**  
in *Tilapia* ovary cell strain: WANG, CHEN, LI & YEW 353
- Gastrulation**  
in chick embryo: SANDERS & PRASAD 497
- Gelatinase**  
immunolocalization in cells and tissues: MURPHY, HEMBRY, MCGARRITY, REYNOLDS & HENDERSON 487
- Glial cells**  
surround damaged axons inhibiting growth: FAWCETT, ROKOS & BAKST 93
- Glucocorticoids**  
effects on glycosaminoglycan expression in intestinal epithelial skin fibroblast co-cultures: BOUZIGES, SIMON-ASSMANN, LEBERQUIER, HAFFEN & KEDINGER 679
- Glycoconjugates**  
in lectin binding of F9 carcinoma cells: TIENARI, VIRTANEN & LEHTONEN 561
- Glycophorin**  
expression in murine erythroleukaemia cells: ULMER, DOLCI & PALADE 163
- Glycoprotein**  
of VSV, intracellular transport: BURKHARDT & ARGON 633
- Glycosaminoglycans**  
expression in intestinal epithelial skin fibroblastic cell cultures: BOUZIGES, SIMON-ASSMANN, LEBERQUIER, HAFFEN & KEDINGER 679  
facilitate movement of fibroblasts through 3-D collagen matrices: DOCHERTY, FORRESTER, LACKIE & GREGORY 263
- Golgi**  
transport of glycoprotein of VSV at late post-translational stage: BURKHARDT & ARGON 633
- Growth factors**  
assessment using cell counting method: OLIVER, HARRISON, BISHOP, COLE & LAURENT 513

## H

- Heat shock**  
morphological changes mimicked by methotrexate: JACKSON, PEARSON, FRASER, PRISE & WONG 37  
protein of *Drosophila*, interaction with nucleus of ecdysome-stimulated cells: BEAULIEU, ARRIGO & TANGUAY 29
- Histone gene**  
expression in developing rice: RAGHAVAN 217

**HMG-CoA reductase**

activity in *Physarum*: ENGSTRÖM, LARSSON & SACHSENMAIER 341

**hsp27**

of *Drosophila*, interaction with nucleus of heat-shocked ecdysome-stimulated cells: BEAULIEU, ARRIGO & TANGUAY 29

**Human sweat glands**

cell line with capacity from transepithelial ion transport: LEE & DESSI 241

**Hydrogels**

hydroxymethylmethacrylate, in study of cell-substratum interactions: BERGETHON, TRINKHAUS-RANDALL & FRANZBLAU 111

**Hydroxymethylmethacrylate**

hydrogels as tools in study of cell-substratum interaction: BERGETHON, TRINKHAUS-RANDALL & FRANZBLAU 111

**Hypoxia**

effect on cultured aortic endothelia: SMITH 505

**I****Image analysis**

of kinetichore size variation in mammalian chromosomes: CHERRY, FAULKNER, GROSSBERG & BALCZON 281

**Immunocytochemistry**

in localization of nucleolar antigen: VERHEIJEN, KUIJPERS, SCHLINGEMANN, BOEHMER, VAN DRIEL, BRAKONHOFF & RAMAEKERS 123

**Immunoelectron microscopy**

in study of distribution of surface antigens in *Paramecium*: ANTONY & CAPDEVILLE 205

in study of erythrocyte membrane proteins during malarial invasion: DLUZEWSKI, FRYER, GRIFFITHS, WILSON & GRATZER 691

of desmosomal and lectin-binding site changes during differentiation in normal human epidermis: SKERROW, CLELLAND & SKERROW 667

**Immunofluorescence**

in identification of myosin polypeptides in *Nicotiana* pollen tubes: TANG, HEPLER & SCORDILIS 569

in study of kinetochore variation in mammalian chromosomes: CHERRY, FAULKNER, GROSSBERG & BALCZON 281

**Immunofluorescence microscopy**

in study of microtubule orientation during stomatal differentiation in grass: CHO & WICK 581

in study of preprophase bands in soybean protoplasts: WANG, CUTLER & FOWKE 575

**Immunolocalization**

of VSV glycoprotein in Golgi: BURKHARDT, HESTER & ARGON 643

of gelatinase in cells and tissues: MURPHY, HEMBRY, MCGARRITY, REYNOLDS & HENDERSON 487

**In situ hybridization**

in study of anther and pollen development in *Oryza sativa*: RAGHAVAN 217

**InsP<sub>3</sub>**

in study of effects of MSH on melanoma cells: SLOMINSKI, MOELLMANN & KUKLINSKA 551

**Intermediate filaments**

ATP-dependent and actin-dependent collapse: HOLLENBECK, BERSHADSKY, PLETJUSHKINA, TINT & VASILIEV 621

cross-react with monoclonal antibody to carrot fibrillar bundles: HARGREAVES, DAWSON, BUTCHER, LARKINS, GOODBODY & LLOYD 371

not in cells that express nuclear lamins: PAULIN-LEVASSEUR, SCHERBARTH, GIESE, ROSER, BOHN & TRAUB 361

**Intestine**

epithelial skin fibroblastic cell cultures, glycosaminoglycan expression: BOUZIGES, SIMON-ASSMANN, LEBERQUIER, HAFFEN & KEDINGER 679

**Intracellular transport**

of glycoprotein of VSV at late post-translational stage: BURKHARDT & ARGON 633

of secretory proteins, effects of potassium: JUDAH, HOWELL, TAYLOR & QUINN 173

quantitative analysis: NOE & DELENICK 449

**Invasiveness**

of chick embryonic cells in basement membrane matrix: SANDERS & PRASAD 497

**Ion transport**

capacity retained by cultured human sweat gland epithelia: LEE & DESSI 241

**K****Kinetic model**

for analysis of protein processing and intracellular transport: NOE & DELENICK 449

**Kinetochores**

size variation in mammalian chromosomes: CHERRY, FAULKNER, GROSSBERG & BALCZON 281

**M****Malaria**

red cell membrane protein distribution during invasion: DLUZEWSKI, FRYER, GRIFFITHS, WILSON & GRATZER 691

**Mammalian fertilization**

study of sperm-egg interaction: VASQUEZ, PHILLIPS & WASSARMAN 713

**Meiosis**

in eggplant, organization of cytoskeleton: TRAAS, BURGAIN & DUMAS DE VAULX 541

**Melanocyte stimulating hormone**

inhibits growth in amelanotic hamster melanoma cells: SLOMINSKI, MOELLMANN & KUKLINSKA 551

**Membrane surfaces**

of spermatozoa revealed by fracture-flip: ANDERSSON FORSMAN & PINTO DA SILVA 415

**Membranes**

distribution of antigens in *Paramecium* during antigenic variation: ANTONY & CAPDEVILLE 205

**Methotrexate**

-induced morphological changes like those after heat shock: JACKSON, PEARSON, FRASER, PRISE & WONG 37

**Mevalonic acid**

effects on HMG-CoA reductase and nuclear division in *Physarum*: ENGSTRÖM, LARSSON & SACHSENMAIER 341

**Mevinolin**

effects on HMG-CoA reductase and nuclear division in *Physarum*: ENGSTRÖM, LARSSON & SACHSENMAIER 341

**Microinjection**

of antibodies to RNA polymerase I in study of RNA synthesis in murine B lymphocytes: HALLECK, SCHLEGEL & ROSE 101

**Microinterferometry**

of cell locomotion in fibroblasts: BROWN & DUNN 379

**Microtubule-associated proteins**  
in non-neural cells, characterization: DÍAZ-NIDO & AVILA 607

**Microtubule dynamics**  
*Physarum* tubulin incorporation into mammalian cell microtubules: PRESCOTT, FOSTER, WARN & GULL 595

**Microtubules**  
after removal from cilia, ninefold ciliary structure retained: STEPHENS, OLESZKO-SZUTS & LINCK 391  
in cytoskeleton organization in *Solanum melongena* L.: TRAAS, BURGAIN & DUMAS DE VAULX 541  
in intermediate filament collapse: HOLLENBECK, BERSHADSKY, PLETJUSHKINA, TINT & VASILIEV 621  
insect, force generation in extracted translocation system: STEBBINGS & SHARMA 21  
of quail oviduct, *in vitro* effects of taxol: BOISVIEUX-ULRICH, LAINE & SANDOZ 9  
orientation during stomatal differentiation in grass: CHO & WICK 581

**Microtubule surface**  
tubulin domains detected by monoclonal antibodies: DRÁBER, DRÁBEROVÁ, LINHARTOVÁ & VIKLICKÝ 519

**Microtubule turnover**  
slower in domains that become acetylated: WEBSTER & BORISY 57

**Mitosis**  
in *Drosophila*: GLOVER 137

**Mitotic fibroblasts**  
polypeptide pattern in stem cells *in vivo*: FRAN CZ, BAYREUTHER & RODEMANN 231

**Monensin**  
in VSV accumulation of glycoprotein in Golgi: BURKHARDT, HESTER & ARGON 643

**Monoclonal antibodies**  
in detection of tubulin domains on microtubule surface: DRÁBER, DRÁBEROVÁ, LINHARTOVÁ & VIKLICKÝ 519

**Myosin**  
heavy chain polypeptides in *Nicotiana* pollen tubes: TANG, HEPLER & SCORDILIS 569

**Myotendinous junction**  
in *Xenopus* muscle cells: ROCHLIN, CHEN, TOBLER, TURNER, BURRIDGE & PENG 461

## N

**Neurite retraction**  
induced by serum factor in neuroblastoma X glioma cells: GH AHARY, McPHERSON & CHENG 251

**Neuroblastoma cells**  
serum factor induces neurite retraction: GH AHARY, McPHERSON & CHENG 251

**Neuromuscular junction**  
in *Xenopus* muscle cells: ROCHLIN, CHEN, TOBLER, TURNER, BURRIDGE & PENG 461

**Non-neural cells**  
proteins related to brain MAP-1B, characterization: DÍAZ-NIDO & AVILA 607

**Nuclear division**  
in *Physarum polycephalum*: ENGSTRÖM, LARSSON & SACHSENMAIER 341

**Nuclear lamins**  
expression in mammalian somatic cells: PAULIN-LEVASSEUR, SCHERBATH, GIESE, ROSER, BOHN & TRAUB 361

**Nuclear migration**  
in *Nicotiana* pollen tubes: TANG, HEPLER & SCORDILIS 569

**Nucleic acids**  
regulation of cyclic AMP binding activity by, in *Dictyostelium*: PARISENTI & COUKELL 291

**Nucleoids**  
formed after cells lysed by methotrexate: JACKSON, PEARSON, FRASER, PRISE & WONG 37

**Nucleolar antigen**  
detected by Ki-67, localization in interphase: VERHEIJEN, KUIJPERS, SCHLINGEMANN, BOEHMER, VAN DRIEL, BRAKENHOFF & RAMAEKERS 123  
detected by Ki-67 in mitotic cells: VERHEIJEN, KUIJPERS, VAN DRIEL, BECK, VAN DIERENDONCK, BRAKENHOFF & RAMAEKERS 531

**Nucleus**  
of heat-shocked, ecdysome-stimulated cells, interaction with hsp27 of *Drosophila*: BEAULIEU, ARRIGO & TANGUAY 29

## O

**Oligodendrocytes**  
repel axons and inhibit axonal growth: FAWCETT, ROKOS & BAKST 93

**Oryza sativa**  
anther and pollen development: RAGHAVAN 217

## P

**Paramecium**  
microtubule-free cortical residues: WILLIAMS, HONTS & STUART 427  
secretory granules, biochemistry: TINDALL, DeVITO & NELSON 441  
secretory vesicle is acidic: BUSCH & SATIR 197  
surface antigen distribution during antigenic variation: ANTONY & CAPDEVILLE 205

**Patching**  
ConA-induced receptor, plasma membrane proteins in Triton-insoluble fraction: PATTON, DHANAK & JACOBSON 85

**Peptide mapping**  
of proteins related to brain MAP-1B: DÍAZ-NIDO & AVILA 607

**Phosphoprotein**  
in *S. pombe* cell cycle: SIMANIS & NURSE 51

**Photoaffinity labelling**  
in study of cyclic GMP-binding activity in *Dictyostelium*: PARISENTI & COUKELL 291

**Pigment epithelium**  
surface transferrin receptors associated with cytoskeleton: HUNT, DEWEY & DAVIS 655

**Plant cytoskeleton**  
in carrot cytoplasmic fibrillar bundles: HARGREAVES, DAWSON, BUTCHER, LARKINS, GOODBODY & LLOYD 371

**Plasma membrane**  
proteins in Triton-insoluble fraction of *D. discoideum* cells during capping: PATTON, DHANAK & JACOBSON 85

**Poly(A)-containing RNA**  
expression in anther and pollen development in *Oryza sativa*: RAGHAVAN 217

**Postmitotic fibroblasts**  
polypeptide pattern in stem cells *in vivo*: FRAN CZ, BAYREUTHER & RODEMANN 231

**Post-translational modification**  
in intracellular transport of VSV glycoprotein: BURKHARDT & ARGON 633  
of tubulin by acetylation: WEBSTER & BORISY 57

**Potassium**  
 effects on intracellular transport of secretory proteins:  
 JUDAH, HOWELL, TAYLOR & QUINN 173

**Preprophase band**  
 during stomatal differentiation in grass: CHO & WICK 581  
 microtubules in soybean protoplast cultures: WANG, CUTLER  
 & FOWKE 575

**Protein kinetics**  
 of protein processing and intercellular transport: NOE &  
 DELENICK 449

**Proteoglycan**  
 synthesis in chondrocytes, inhibited by Cyclofenil  
 diphenol: LANCASTER, FRYER, GRIFFITHS & MASON 271

**Protoplast cultures**  
 soybean, preprophase bands: WANG, CUTLER & FOWKE 575

**Physarum polycephalum**  
 effects of tunicamycin, mevinolin and mevalonic acid on  
 HMG-CoA reductase and nuclear division: ENGSTRÖM,  
 LARSSON & SACHSENMAIER 341  
 tubulin, incorporation into mammalian cell microtubules:  
 PRESCOTT, FOSTER, WARN & GULL 595

## Q

**Quail oviduct**  
 ciliogenesis, effects of taxol, *in vitro*: BOISVIEUX-ULRICH,  
 LAINE & SANDOZ 9

## R

**RBL (rat basophilic leukaemia cells)**  
 recycling of 80K membrane protein: BONIFACINO, YUAN &  
 SANDOVAL 701

**Reactivated model**  
 in study of force generation in insect microtubule  
 translation system: STEBBINGS & SHARMA 21

**RNA polymerase I**  
 in RNA and DNA synthesis in murine B lymphocytes:  
 HALLECK, SCHLEGEL & ROSE 101

**rRNA synthesis**  
 in murine B lymphocytes, role of RNA polymerase I:  
 HALLECK, SCHLEGEL & ROSE 101

## S

**Schizosaccharomyces pombe**  
 protein required for commitment to the cell cycle: SIMANIS  
 & NURSE 51  
 wild-type and mutant *cdc2.33* cells: KHAR &  
 MITCHISON 345

**Secretion**  
 biochemical characterization of proteins in *Paramecium*:  
 TINDALL, DeVITO & NELSON 441

**Secretory proteins**  
 intracellular transport, effects of potassium: JUDAH,  
 HOWELL, TAYLOR & QUINN 173

**Secretory vesicle**  
 of living *Paramecium* is acidic: BUSCH & SATIR 197

**Serotonin**  
 -containing granules of 80K membrane protein recycling,  
 in RBL cells: BONIFACINO, YUAN & SANDOVAL 701

**Serum factor**  
 induces neurite retraction in neuroblastoma X glioma cells:  
 GHAHARY, McPHERSON & CHENG 251

**Size mutants**  
 in *Tetrahymena* in cell cycle: CLEFFMANN 349

**Solid-phase binding assay**  
 in study of mouse sperm-egg interaction: VASQUEZ,  
 PHILLIPS & WASSARMAN 713

**Somatic cells**  
 lacking intermediate filament proteins, expression of  
 nuclear lamins: PAULIN-LEVASSEUR, SCHERBARTH, GIESE,  
 RÖSER, BOHN & TRAUB 361

**Spermatozoa**  
 surface views revealed by fracture-flip: ANDERSSON  
 FORSMAN & PINTO DA SILVA 415

**Sperm-egg interaction**  
 in mouse: VASQUEZ, PHILLIPS & WASSARMAN 713

**Sperm receptors**  
 in mouse fertilization: VASQUEZ, PHILLIPS &  
 WASSARMAN 713

**Spindle proteins**  
 in non-neural cells: DÍAZ-NIDO & AVILA 607

**Stem-cell system**  
 polypeptide pattern in differentiating cells: FRAN CZ,  
 BAYREUTHER & RODEMANN 231

**Sterility**  
 in cystic fibrosis, study of cultured ductal epithelial cells  
 from epididymis and vas deferens: HARRIS &  
 COLEMAN 687

**Stomatal complex**  
 in grass, microtubule orientation: CHO & WICK 581

**Soybean**  
 protoplast culture, preprophase bands: WANG, CUTLER &  
 FOWKE 575

**Surface antigen**  
 uneven distribution during antigenic variation in  
*Paramecium*: LANCASTER, FRYER, GRIFFITHS &  
 MASON 271

**Surface markers**  
 in lectin binding of F9 carcinoma cells: TIENARI, VIRTANEN  
 & LEHTONEN 561

## T

**Talin**  
 linked trans-membrane by integrins to extracellular matrix:  
 FATH, EDGELL & BURRIDGE 67  
 relation to acetylcholine receptor clusters in *Xenopus*  
 muscle cells: ROCHLIN, CHEN, TOBLER, TURNER, BURRIDGE  
 & PENG 461

**Taxol**  
*in vitro* effects on quail oviduct ciliogenesis: BOISVIEUX-  
 ULRICH, LAINE & SANDOZ 9

**Tektins**  
 in cilia after removal of microtubules: STEPHENS, OLESZKO-  
 SZUTS & LINCK 391  
 quantal synthesis and ciliary length in sea-urchin embryos:  
 STEPHENS 403

**Teratocarcinoma**  
 cells, differentiation: TIENARI, VIRTANEN & LEHTONEN 561

**Tetrahymena**  
 cultured, cell volume and dry weight: HELLUNG-LARSEN &  
 ANDERSEN 319

**Tetrahymena thermophila**  
 transient division block, inducible at every cell cycle stage:  
 CLEFFMANN 349

**Thermoresistance**  
 in *Tilapia* ovarian cell strain: WANG, CHEN, LI & YEW 353

**Tilapia**  
 cells, ovarian, heat-resistant strain: WANG, CHEN, LI &  
 YEW 353

- Tissue culture**  
effect of hypoxia: SMITH 505
- Transferrin receptors**  
on pigment epithelium, associated with cytoskeleton: HUNT, DEWEY & DAVIS 655
- Transformation**  
of diploid female Chinese hamster cells: GRANT & WORTON 723
- Trans-Golgi**  
of VSV, accumulation of glycoprotein: BURKHARDT, HESTER & ARGON 643
- Trans-Golgi reticulum**  
in study of tyrosinase activity in melanoma cells: SLOMINSKY, MOELLMANN & KUKLINSKA 551
- Trichocyst**  
proteins in *Paramecium*: TINDALL, DeVITO & NELSON 441
- Triple label immunofluorescence**  
in study of turn over of domains of microtubule acetylation: WEBSTER & BORISY 57
- Tubulin**  
from *Physarum*, incorporation into mammalian cell microtubules: PRESCOTT, FOSTER, WARN & GULL 595
- Tubulin domains**  
detected on microtubule surface by monoclonal antibodies: DRÁBER, DRÁBEROVÁ, LINHARTOVÁ & VIKLICKÝ 519
- Tumour suppression**  
location of gene in rat chromosome 5 is in the same region as alpha interferon locus: ISLAM, SZPIRER, SZPIRER, ISLAM, DASNOY & LEVAN 147
- Tunicamycin**  
effects on HMG-CoA reductase and nuclear division in *Physarum*: ENGSTRÖM, LARSSON & SACHSENMAIER 341
- Two-dimensional gel electrophoresis**  
in study of [<sup>35</sup>S]-labelled polypeptide pattern in fibroblast stem cells: FRAN CZ, BAYREUTHER & RODEMANN 231
- Type IV collagenase**  
immunolocalization in cells and tissues: MURPHY, HEMBRY, McGARRITY, REYNOLDS & HENDERSON 487
- U**
- Ultraviolet sensitivity**  
in *Tilapia* ovary cell strain: WANG, CHEN, LI & YEW 353
- V**
- Vacuoles**  
accumulation of glycoprotein in presence of CCCP: BURKHARDT, HESTER & ARGON 643
- Vas deferens**  
human foetal, ductal epithelial cells in cystic fibrosis: HARRIS & COLEMAN 687
- Vitronectin receptor**  
predominant integrin in substratum adhesion: FATH, EDGELL & BURRIDGE 67
- VSV**  
glycoprotein, intracellular transport: BURKHARDT & ARGON 633
- W**
- Western blotting**  
in study of myosin heavy chain polypeptides in *Nicotiana* pollen tubes: TANG, HEPLER & SCORDILIS 569
