

INDEX TO JOURNAL.

VOL. XI, NEW SERIES.

- ACANTHOCEPHALOID SOLECID, notes on appendicularia and the larval condition of an, by W. Saville Kent, 267
- Acanthocystis spinifera* (Greeff), by W. Archer, 137
- Acetate of potash, solution of, as a substitute for glycerin in preserving animal tissues, by Max Schultze, 285
- Achromatic combination for use with blue light, by G. Johnstone Stoney, 212
- Allman, Prof., on a mode of reproduction by spontaneous fission in the hydroids, 18
- Amnion, Schenck, on development of the, 421
- Amphidotus cordatus*, notes on, by D. Robertson, 25
- Amphiprora, on some new species of the genus, by Rev. E. O'Meara, 21
- Amphizonella digitata* (Greeff), 129, 134
- " *flava* (Greeff), 130, 134
- " *vestita* (Greeff), 112, 135
- " *violacea* (Greeff), by W. Archer, 126, 134
- Archer, W., on some freshwater Rhizopoda, new or little-known, 107
- Ascidian larvæ, on the so-called chorda of the, and the alleged affinity of the invertebrate and vertebrate animals, by W. Donitz, 281
- BACTERIA, origin of, by Burdon-Sanderson, 325
- Barker, Dr. J., on an open compressorium, 23
- Bathybius, by Dr. Gümbel, 79
- Beneden, E. van, researches on the development of the Gregarina, 242
- Biologische Studien, Haeckel, Dr., 60
- Bizzozero, Dr., medulla of bone, 292
- Blatta orientalis*, the circulation in the wings of, by H. N. Moseley, 389
- Blood, by Prof. Neumann, 292
- Blood-corpusele, on the red, by E. Ray Lankester, 361
- Blood-corpuseles, theory of the development of, by Neumann, 43
- Blood-vessels, formation of, 420
- Bone, by Dr. L. Beale, 198
- Brain, connective tissue of the, by Dr. Golgi, 88
- Bryozoa, note on Dr. H. Nitsche's paper on "Some interesting points concerning the mode of reproduction of the," by Rev. Th. Hincks, 235
- " on some interesting points concerning the mode of reproduction of the, by Dr. H. Nitsche, 155
- Buccal teeth in the genus *Firola*, discovery of, by Dr. Macdonald, 272
- Burdon-Sanderson, on the origin and distribution of microzymes (bacteria) in water and in the living body, 323
- CAMPANULARIDÆ, family of, 18
- Cartilage and ossification, by Prof. Neumann, 198
- Charts for recording absorption spectra, 78
- Chloride gold, in examining the tissues, by H. Moseley, 287
- Cidaris, on the minute structure of certain hard parts of the genus, by Ch. Stewart, 51

- Cienkowsky, Prof. C. L., on the production of swarm-spores in *Noctiluca miliaris*, 305
- " " " on the production of spores in the Radiolaria, 396
- Ciliary movements, by Prof. Haeckel, 308
- Cholera-fungus, the government investigation of, 79
- Classification, histological, by Rollet, 309
- Coal, sections of, by J. Slade, 284
- Cohn's, Dr. F., new botanical periodical, 285
- Colouring matter of some aphides, by H. C. Sorby, 352
- Compressorium, on an open, by Dr. J. Barker, 93
- Connective tissue of the brain, by Golgi, 88
- Cordylophora lacustris*, structure of, 418
- Cornea, some remarks on the nerves of the, of the rabbit and frog, by H. N. Moseley, 261
- DAVIS, H., mobility of spines on certain insects' eggs, 288
- Death of Professor Sweigger-Seidel, 417
- Diatomaceæ, new work on the British, 79
- Doliolum, notes on the genus, by Dr. Moss, 403
- Donitz, W., on the so-called chorda of the ascidian larvæ, and the alleged affinity of the invertebrate and vertebrate animals, 281
- Dudgeon, Dr. R. E., on a submersion microscope, 239
- EBERTH, Prof., researches of the normal and pathological anatomy of the frog's skin, 298
- Egg, mobility of spines on certain insects, by H. Davis, 288
- Egg of frog, on certain methods which may be employed in the investigation of the development of the, by H. N. Moseley, 151
- Embryology, 305
- Exner, Dr. S., researches on the olfactory mucous membrane of the frog, 300
- FLEMMING, development of fatty tissue, 295
- Foreign microscopes, 417
- Fungi in potable water, by Prof. Frankland, 286
- " parasitic ear, by D. Karsten, 286
- Fungus as a cause of hooping-cough, 197
- GASTEROPODS, striated muscular fibre in, 197
- " muscular fibre of the pharynx of, 417
- Gland-cells, the nature of the influence of nerves on, 303
- Glands of the stomach, by Heidenhain and Ebstein, 200
- Golgi, Dr., lymphatics in connection with cerebral arteries, 297
- Gregarina, researches on the development of the, by E. van Beneden, 242
- Grimm, O. von, parthenogenesis in the pupa state of insects, 88
- Gümbel, Dr., on bathybius, 79
- HAECKEL, Dr. E., biologische studien, 60
- " ciliary movement, 308
- Hæmoglobin, new book on, 417
- Handbook of Histology, by Stricker, 198
- Hincks, Rev. Th., note on Dr. H. Nitsche's paper on "Some interesting points concerning the mode of reproduction of bryozoa," 235
- Hydroïda, on a mode of reproduction by spontaneous fission in the, by Prof. Allman, 18
- IMPROVEMENTS in the lenses of microscopes, 190
- Insects, parthenogenesis in the pupa state of, by O. von Grimm, 88
- KARSTEN, Dr., parasitic ear fungi, 286
- Kent, W. Saville, notes on Appendicularia, and the larval condition of an *Acanthocephaloid scolecid* from the coast of Portugal, 267
- King crab, young stages of the, 89
- " cornea, 87
- Klein, Dr., dammar varnish, 288
- " on the peripheral distribution of some non-medullated nerve-fibres, 405
- Krause, Dr. W., nerve, 86

- Krause, Dr. W., the nature of connective tissues, 275
- Kühne, Dr. W., appointment of, 190
- Kudrat, on cell pathology, 419
- LANKESTER, E. Ray, on the red blood-corpuscle, 361
- " on the structure and origin of the spermatophores, or sperm-ropes, of two species of *Tubifex*, 180
- " on *Undulina*, 387
- Leaves, on the colour of, at different seasons of the year, by H. C. Sorby, 215
- Lewis, Dr. T. R., the government investigation of cholera-fungus, 79
- Limulus polyphemus*, on the embryology of, by A. S. Packard, 263
- Lindsay, W. Lauder, observations on lichenicolous micro-parasites, 28
- Liver, 201
- Lymphatics in connection with cerebral arteries, by Dr. Golgi, 297
- MACALISTER, Prof., on some species of parasites hitherto undescribed, 163
- Macdonald, Dr. J. D., examination of two soundings, 273
- " discovery of buccal teeth in the genus *Firola*, 274
- Manual of pathological histology, by Rindfleisch, 198
- Martin, J. H., microscopic objects figured and described, 188
- Medical jurisprudence, principles and practice of, by A. Swaine Taylor, M.D., 68
- Medulla of bones, by Dr. G. Bizzozero, 292
- Microscope, an improved apparatus for drawing with the, by E. T. Newton, 270
- Microscope in the study of rocks, 192
- Microscope, on a submersion, by R. E. Dudgeon, 239
- Microscopes, foreign, 417
- Microscopic investigation, notes on the method of application of nitrate of silver and chloride of gold in the preparation of certain tissues for, by H. N. Moseley, 55
- " objects, figured and described, by J. H. Martin, 188
- Microscopical Club proceedings, Dublin, 92, 208, 311
- Microscopical Club, Queckett, 106
- " Society, Royal, 104
- Microscopical vision, researches on the errors of, and on new methods of correcting them, by Dr. Royston-Figgott, 1
- Migration of cells, by Dr. Carton, 198
- Mole, nose of, as an organ of touch, 420
- Moseley, H. N., on certain methods which may be employed in the investigation of the development of the frog's egg, 151
- " some remarks on the nerves of the cornea of the rabbit and frog, 261
- " on the circulation in the wings of *Blatta orientalis*, 389
- Mouse's ear as an organ of sensation, by Dr. Schöbel, 289
- Moss, Dr., notes on the genus *Doliolum*, 403
- Muscular fibre of pharynx of Gastropods, 417
- NERVE fibres, on the peripheral distribution of some non-medullated, by E. Klein, 405
- Nerve, W. Krause, 86
- Nervous system, by Meynert, 202
- Newton, E. T., an improved apparatus for drawing with the microscope, 270
- Nitsche, Dr. H., on some interesting points concerning the mode of reproduction of the bryozoa, 155
- Neumann, Prof., cartilage and ossification, 198
- " theory of the development of blood-corpuscles, 43
- OBJECTIVES, cheap, of high power, 78
- Oellacher, embryology, 305
- Olfactory mucous membrane of the frog, researches on, by Dr. Exner, 300
- O'Meara, Rev. E., on some new species of the genus *Amphiprora*, 21
- Origin and distribution of microzymes (bacteria) in water, and the circumstances which determine their existence in the tissues and liquids of the living body, by Dr. Burdon-Sanderson, 323
